TeleHealth Physical Therapy

Live Telehealth Therapy (Virtual Visit) at Holsman Physical Therapy! Free Screening Trial

A telehealth (or virtual visit) is almost the same as an office visit, but instead of visiting us physically at our clinic, you will use our Holsman Physical Therapy's HolsmanPT.Doxy.me portal to have a digital "face-to-face" session with your therapist.

Once connected, your therapist will assess your condition and provide real-time guidance and feedback, while actively taking you through your therapy session.

Who should use Telehealth?

Due to the Covid-19 pandemic, some patients who are high risk for complications may be better off seen virtually than being in an on-person appointment to minimize exposure to the virus.

At Holsman Physical Therapy, we believe that everyone should have their joints, muscles, and movement patterns assessed every year to ensure continued physical health. That's why we're launching a campaign to promote a lifetime of pain-free movement in our community by offering this free screening to all of our past patients. Simply fill out the form on this page and we'll get in touch to schedule your one-on-one session with one of our physical therapists.

Nearly any rehabilitation treatment can be performed through telehealth capabilities. Whether you underwent a recent knee replacement surgery, have any sort of chronic condition, joint pain, or pain, this cutting-edge technology will allow an experienced therapist to treat you virtually, so you achieve your goals. In this virtual environment, clinicians will educate patients and give you the exercises and training you need to improve your current state and reduce pain. This patient-centered program is all about you; you'll be empowered and trained by a professional therapist who will give you the activities and strategies you may need to do the exercises properly. Through the secure video call system, they will be able to provide monitoring and evaluation to ensure a quality experience that allows you to feel better, faster with long term results.

Whether you're staying home, out of town, or can't make your appointment, telehealth has:

Seamless interface with a licensed clinician throughout your appointment

Real-time feedback, assessment, and guidance from therapists

Uninterrupted compliance with your physical, occupational, or speech therapy prescription

HIPAA compliant, encrypted platform by the worldwide leader in telehealth

Message and connect with your therapist and conduct 1:1 private sessions all through the

HolsmanPT.Doxy.me portal, No apps to download! You can use your phone or any device with internet connection, browser, audio and video capability (Laptop, Ipad, Tablet, Desktop Computer, Iphone, Android)

Terms and Conditions: The complimentary screening is a free wellness service that is designed to promote healthy pain free living ("Screening"). The licensed professional providing the Screening will not be performing a comprehensive rehabilitation therapy evaluation, but only making a determination as to whether a comprehensive rehabilitation therapy evaluation and/or referral to another health care professional is required. The Screening is not a physical or occupational therapy treatment intervention or the provision of any other health care service that is required to be provided by an individual licensed or certified by a

state licensing board, and therefore no plan of care and/or medical record will be created in conjunction with the Screening. The Screening has no monetary value. The provider of the Screening will not bill an insurance company for the Screening. Eligibility to participate in the Screening is not conditioned upon obtaining other services from the provider of the Screening. The Screening does not create nor is it intended to create a relationship of patient and provider.
